## Power Joint

Busduct fitting - Busduct systems

The Power Joint is a standard PowerBox busduct system component that connects two busduct sections of the same rating and configuration, using phase insulators, conductor supports, spring washers, and a double-headed torque bolt.

### KEY SPECIFICATIONS

CONDUCTOR

**Copper or aluminum**

INSULATION

**Phase insulator per joint**

JOINT HARDWARE

**Torque bolt, spring washers**

LISTING

**UL**

---

### FULL SPECIFICATIONS

#### CONSTRUCTION

---

Function

**Connects busduct sections of the same rating and configuration**

Conductor

**Copper or aluminum phase conductor** -

Hardware

**Formed plate joint support, double-headed torque bolt, cupped spring w**

Insulation

**Phase insulator and ground bus at each joint**
